Subject Reference on cooperation between June 2000 and May 2002

To whom it may concern

LG.Philips Displays herewith declares its complete satisfaction about the cooperation with Gate Television on the recording of progress on the construction of the LG.Philips Displays Technology Center in Hranice and the production of movies on intermediate phases and the final overview of the project.

"In the cooperation with Gate Television we valued especially their professional approach and flexibility towards customer's specifications and requirements to the assigned work. Also their speed and commitment in keeping the set and sometimes very tight terms have been positively appreciated."

The resulting documentaries of the construction of our Technology Center in Hranice have been very useful in communicating about the project, internally as well as externally and have found great appreciation around the world, e.g. Madrid, Mexico, U.S. Budapest, The Hague (NL), Prague, Korea, China, Bucharest, Moscow and at many other company presentations.

Sincerely Yours

Jon Richters
Executive Director
